

Potential Rule Making – Master List

(Subject to change)

Part 1

No current plans for addition, deletions, or modifications

Part 6

- Rule 601 – Definitions
 - **Summary:** Add definitions as needed, edit definition of “existing” for several rules listed below, possibly “RACT related activities”, possible “2015 NNA”
 - **Status:** Draft, ongoing
- Rule 602 – Existing sources of volatile organic compound emissions generally.
 - **Summary:** Considering edits for alternative limits/test methods/etc
 - **Status:** Not yet drafted
- Rule 606 – Loading gasoline into existing stationary vessels of more than 2,000 gallon capacity at dispensing facilities handling 250,000 or more gallons per year
 - **Summary:** Needs to include new NAA
 - **Status:** Not yet drafted
- Rule 607 – Loading gasoline into existing stationary vessels of more than 2,000 gallon capacity at loading facilities
 - **Summary:** Needs to include new NAA
 - **Status:** Not yet drafted
- Rule 610a – Existing coating lines; emission of volatile organic compounds from existing automobile, light-duty truck; and paper, film, and foil coating lines.
 - **Summary:** New rule that parallels Rule 610 with more stringent applicability and limits
 - **Status:** Draft shared with stakeholders
- Rule 618 – Use of cutback or emulsified paving asphalt
 - **Summary:** Modify existing rule to address longer ozone season
 - **Status:** Staff Draft – revision to current rule
- Rule 621a – Emission of volatile organic compounds from existing metallic surface coating lines
 - **Summary:** New rule that parallels Rule 621 with more stringent applicability and limits
 - **Status:** Draft shared with stakeholders

Potential Rule Making – Master List

(Subject to change)

- Rule 624a – Emission of volatile organic compounds from existing graphic arts lines located in the 2015 NAAQS Ozone Nonattainment areas.
 - **Summary:** New rule that parallels Rule 624
 - **Status:** Draft rule
- Rule 632 – Emission of volatile organic compounds from existing automobile, truck, and business machine plastic part coating lines.
 - **Summary:** Modified existing rule for geographic applicability and dates.
 - **Status:** Draft shared with stakeholders
- Rule 633 – Emissions of volatile organic compounds from existing plastic parts and products surface coating; and pleasure craft coating operations.
 - **Summary:** New rule
 - **Status:** Draft shared with stakeholders
- Rule 634 – Emissions of volatile organic compounds from existing industrial solvent cleaning
 - **Summary:** New rule
 - **Status:** Draft rule shared with supervisor and permit staff
- Rule 635 – Emission of volatile organic compounds from existing offset lithographic and letterpress printing lines.
 - **Summary:** New rule
 - **Status:** Draft rule
- Rule 636 – Emission of volatile organic compounds from existing miscellaneous industrial adhesives operations.
 - **Summary:** New rule
 - **Status:** Draft shared with stakeholders
- Rule 660 – Standards for volatile organic compounds emissions from consumer products
 - **Summary:** Modified rule; Phase 4 OTC model rule
 - **Status:** Draft rule shared with stakeholder subgroup
- Rule 661 – Definitions for consumer products
 - **Summary:** Modified rule; rescind and move definitions to Rule 660
 - **Status:** Draft rule shared with stakeholder subgroup
- Rule 662 – Standards for volatile organic compounds emissions from architectural and industrial maintenance coatings

Potential Rule Making – Master List

(Subject to change)

- **Summary:** New rule; Phase 2 OTC model rule
- **Status:** Draft rule shared with subgroup

Part 7

- Rule 704 – Loading gasoline into new stationary vessels of more than 2,000 gallon capacity at loading facilities
 - **Summary:** Needs to include new NAA
 - **Status:** Not yet drafted

Part 8

- Rule 819 – Emissions of oxides of nitrogen from existing/new RACT sources
 - **Summary:** New rule; Boilers, engines, process heaters, turbines, asphalt plants based on neighboring states RACT rules
 - **Status:** Draft started

Part 9

- Rule 902 – Adoption of standards by reference.
 - **Summary:** Modify rule; Reference Consumer Product and AIM model rules; incorporation of CTG definition Appendices
 - **Status:** Draft rule shared with subgroup

Part 10

No current plans for addition, deletions, or modifications

General steps of drafting process

1. Staff draft
2. Internal review
 - a. SIP Unit members
 - b. SIP Unit supervisor
 - c. Permit staff
3. Stakeholder sub(work)group review (option/case-by-case)
4. Workgroup review
